

# Weber® Flame iQ®

to suit Baby Q (Q1000 / Q1200 Classic 2nd Gen)

The Weber Flame iQ is a flame safeguard system with unique patented technology, designed especially for use with a Weber Baby Q. With the Weber Flame iQ fitted to your Baby Q barbecue, you can enjoy added convenience and peace of mind. The Flame iQ is a perfect addition to your Baby Q if you're frequently cooking in windy conditions, or if you wish to use your Baby Q connected to the plumbed LP gas supply of your boat or caravan.

YOUR LOCAL STORE DETAILS

## KEY FEATURES AND BENEFITS

### Retrofittable

The Flame iQ flame safeguard system can be retrofitted, so there's no need to part with your existing Baby Q (Classic - 2nd Generation) to benefit from its unique features.

### Continuous flame monitoring

Once fitted and in use, the Flame iQ continuously senses for a flame at the burner of your Baby Q.

### Built-in reignition sequence

With the built-in reignition sequence, your food will still be cooked to perfection if the flame is blown out and can be successfully reignited.

### Safety lockout mode

In the case of 3 unsuccessful reignition attempts, its lockout mode activates to shut off the gas supply to the burner.

### Intuitive indicator lights

The indicator lights on the Flame iQ control panel make it easy to see what's happening in your barbecue, without lifting the lid.

### Maximum pre-set run time

The Flame iQ will automatically cut the gas supply to your Baby Q after 8 hours of continuous run time - a real gas-saver if you forget to turn your Baby Q off after use!

### Compliance with AS/NZS 5263.1.7:2020

The Flame iQ meets the requirements of the Australian & New Zealand Standard for Outdoor Gas Appliances for barbecues connected to the piping on a caravan or boat.
